A Unique Insight into the Production of Oversize Insulating Glass

sedak presents the largest insulating glass line – visually and in tone

Since 2015, sedak fabricates oversize insulating glass with the world's largest, 145m long insulating glass line. It enables the glass manufacturer to produce double and triple units up to 15m, fully automated and in a reproducible quality.

Back in the days, oversize insulating glass used to be fabricated manually by qualified personnel which took several days. Today, the product passes the entire manufacturing process in less than an hour: from equipping the insulating glass line all the way through to positioning the spacers accurately to a millimeter to de-stacking the finished glass units. Thus, the panes are available more quickly.

In a five-minute video, sedak now shows the impressive fabrication of oversize insulating glass units. The clip gives an interesting insight into the worldwide unique production of oversize glass units. The video can be seen on www.sedak.com and will be available on Vimeo soon.

Leading glass

sedak, the glass manufacturer in Gersthofen, Germany, was founded in 2007. With its 150 employees, the world's leading glass fabricator produces insulating and safety glass in dimensions up to 3.2m x 16m: processed, tempered, laminated, printed, coated, and cold bent. The core capabilities are the lamination of glass, edging, and the company's know-how of producing glass components with additional functional, and decorative elements. sedak's production has been optimized for extraordinary glass sizes; the level of automation for such glass dimensions is unique. All finishing steps are handled in-house e.g. with the new, fully automated insulating glass line. As a full supplier for large-size glass units, sedak sees itself as a partner for architects, designers, and façade constructors. Outstanding references for example as the Apple Cube and the Lincoln Center Canopies in New York, the Städel Museum in Frankfurt, and the Tottenham Court Road Station in London.

Applications

- glass façades
- glass roofs
- glass stairs
- glass balustrades
- ship building
- safety glazing
- all-glass constructions
- interior design
- custom-made glass units
