## CHINA GLASS 2017 in Beijing

# sedak Glass Crystal Clear in China

Which key position glass can have in architecture, sedak (Gersthofen, Germany) will show now in China. At the trade show „China Glass 2017“ in Beijing (24th – 27th May 2017, Hall E1/200), the glass manufacturer presents a façade construction with a supporting glass fin.

As an innovation leader for oversize glass and special solutions, sedak has developed considerable production know-how. The detail of the glass façade serves as an example for that: Even the supporting construction is transparent. The filigree connection of the glass fin and the glass units via toggles is technologically pioneering. Thanks to the particularly small titanium inserts, maximum transparency and the highest level of static safety can be combined. During production, sedak laminates the inserts precisely in between the laminate's layers which makes installation on site easier and demonstrates sedak's exceptional lamination capabilities.

„China Glass“ is an annual event with up to 30,000 international visitors. It focuses on innovations in the fields of special glass, architecture, solar glass, glass production, and glass processing. At the German Pavilion, about 30 German companies will present their products and technologies.

### **Leading glass**

sedak, the glass manufacturer in Gersthofen, Germany, was founded in 2007. With its 150 employees, the world's leading glass fabricator produces insulating and safety glass in dimensions up to 3.2m x 16m: processed, tempered, laminated, printed, coated, and cold bent. The core capabilities are the lamination of glass, edging, and the company's know-how of producing glass components with additional functional and decorative elements. sedak's production has been optimized for extraordinary glass sizes; the level of automation for such glass dimensions is unique. All finishing steps are handled in-house e.g. with the new, fully automated insulating glass line. As a full supplier for large-size glass units, sedak sees itself as a partner for architects, designers, and façade constructors. Outstanding references are for example the Apple Cube and the Lincoln Center Canopies in New York, the Städel Museum in Frankfurt, and the Tottenham Court Road Station in London.

### **Applications**

- glass façades
- glass roofs
- glass stairs
- glass balustrades
- ship building
- safety glazing
- all-glass constructions
- interior design
- custom-made glass units
