

Events

sedak at the GPD

The Glass Performance Days are the independent expert forum for the global glass industry. The series of events taking place in e.g. China, North America and Turkey and containing several conferences, workshops and exhibitions is supposed to drive that development forward, pass on the experts' knowledge and support a successful

networking.

This year's main conference takes place in Tampere, Finland and offers, besides the conference program, numerous workshops and a separate exhibition for glass products.

From Wednesday to Friday, sedak, the worldwide leading finisher of large glass formats, presents its product lines sedak insulating glass and sedak safety glass at the Expo, the glass product exhibition. We would like to invite you to visit us at stand 21. Our consultants will be pleased to give you an insight into sedak's capability of processing glass panes in the world's most modern glass finishing production site of insulating and safety glass. On the basis of our glass samples you will be able to convince yourself of the high quality of our capabilities: processing, tempering, ceramic-ink printing, lamination and the production of insulating glass.
